Washington	0	0	0	1	2	0	3
Windham	1	2	0	2	7	3	15
Windsor	1	1	0	1	0	2	5
Total	7	12	3	11	17	22	72

Lyme Cases with Out-of-State or Unknown Site of Exposure*

Imported Cases	19	28	15	26	20	16	124
Unknown Exposure Cases	-	-	-	-	6	12	18

*Only cases that meet the CDC case definition are included (<http://www.cdc.gov/ncidod/dvbid/lyme/casedef2.htm>). Cases with Vermont exposure (cases in which it has been determined that infection was likely acquired in Vermont) are noted by county of residence. The number of imported cases (cases in Vermont residents which were determined to have most likely been acquired out of state) are totalled for each year. Unknown cases (cases in which potential exposure could have been both in and out of Vermont) are totalled for 2003 and 2004. Prior to 2003 these cases are included in the number of imported cases. Because the numbers of reported Lyme disease cases in Vermont are small, it is not possible to draw conclusions regarding the variations in the numbers from year to year.

Lyme Disease Cases in Northeastern States 1999 - 2003

State	1999	2000	2001	2002	2003	Total	Incidence	
							2001	2002
Connecticut	3215	3773	3597	4631	*1403	16,619	105.02	133.82
Maine	41	71	108	219	175	614	8.39	16.92
Massachusetts	787	1158	1164	1807	1503	6,419	18.25	28.11
New Hampshire	27	84	129	261	191	692	10.24	20.47
New York	4402	4329	4083	5536	**5179	23,529	21.48	28.89
Vermont	26	40	18	37	43	141	2.94	6

* Drop in case #s in '03 is due to a change in the reporting system. Data is not comparable to '01,'02.

** Estimate

Incidence is per 100,000
